

User Manual

Working inside one center: members, pledges, collection, passes, the gate and Guruji Darshan. One section per menu entry.

Every amount in this manual is an example, written as ₹xx,xxx.

How to use this manual

One section per menu entry, in the order they appear down the left of the screen.

Everybody reads

- Signing in, the language button and the instruction pages
- What your rights decide you can see
- Dashboard, Members, Sankalp, Collection
- Passes, Attendance and Guruji Darshan
- Reports, and what to do when something refuses

Center users also read

- Working inside one center
- Fast Entry for a long list
- Bulk edit for a stack of slips
- Registering walk-ins at the door

Team Members also read

- Centers, and who is allowed what
- Head Office attendance and pass numbering
- Roles, Users and the Activity Log
- Communication: templates, schedules, instructions

In every section

- What each column on the page means
- What each button along the top does, and the right it needs
- The steps, numbered, for the ordinary job
- The mistakes worth avoiding, in the cream boxes

Signing in

1

Everybody

The instruction pages

Everybody • first sign-in, and whenever they change

1 Read the page

Each one is short and written for your role.

2 Switch language if you prefer

The **English** / switch at the top of the dialog turns the whole page over.

3 Tick to confirm

The button stays greyed out until you do.

4 Continue

The next page appears, then the system opens.

Reading them again

- The **Instruction & Manual** button near the bottom of the menu — one entry, two tabs
- Instructions on one tab, these manuals on the other
- Your original acceptance stays on record
- Rewrite a page and everyone is asked to accept the new version

WHY YOU CANNOT SKIP IT

An instruction nobody reads is worse than none at all

Because everyone then assumes it was read. So the pages sit in front of the system rather than beside it, and your acceptance is recorded with the date. You can read them again at any time from Instruction & Manual, at the bottom of the menu. If a page is rewritten you will be asked to accept the new version, and your earlier acceptance stays on record.

Your first sign-in

Everybody

Change your password

- The one you were given is known to whoever set you up
- Use something you do not use elsewhere
- Never share it — the log cannot tell two people apart

Check what you can see

- Your menu is built from your rights
- A missing page was not given to you
- Ask for it rather than borrowing another login

THE LANGUAGE BUTTON

The button at the top right of the header switches the whole screen between English and Gujarati. It shows the language you would switch to, so means you are reading English now. Your choice is saved against your account, so the system opens in it next time. New accounts start in English.

What you can see

2

Everybody — and why two people see different things

Rights, in plain terms

Set per role, and adjustable per person. Ask if you need one.

Right	What it decides	Typically held by
Pages	Which menu entries exist at all	Varies by role
Members	Adding and editing people	Center Sant, Accountant
Sankalp	Pledges, bulk edit, carry forward, Guruji Darshan	Center Sant, Accountant
Money	Whether amounts are visible at all	Sant, Accountant, Head Office
Collection	Entering money received	Center Accountant
Passes	Generating, and which paper you may print	Sant, HO printing team
Attendance	The gate, seat slips, seeing the list	Gate volunteers
Communication	Templates, schedules, sent messages	HO team
Administration	Centers, users, import, export	Super Admin

THE FOUR MONEY RIGHTS

Amounts are hidden individually, on the server

Sankalp, Collected, Pending and Dharmada are four separate rights. A volunteer can work a screen without being shown the money on it, and the figures are never sent to the browser at all — they are not merely hidden from view. Where you do not hold the right the column shows a dash. A dash means "you are not shown this"; a zero would mean "nothing was pledged", and the two must never be read as the same thing.

The filter bar, on every page

Everybody • the first thing to check when a page looks wrong

Year

- Almost every page has it, at the top left
- It decides which puja year you are looking at
- It is remembered as you move from page to page
- A page that looks empty is nearly always the wrong year

Search, and the rest

- **Search** takes a name, ID, mobile, center, firm, seat or amount — and several at once, separated by commas
- Some pages add their own boxes: Center, Type, Pass type, Show
- Filters stay on until you clear them
- Every column heading sorts; shift-click adds a second level

Dashboard

3

Everybody • the state of the event on one screen

The cards across the top

What each one counts

Card	What it counts	Right needed
Total Centers	Centers active this year	Dashboard
Total Members	Members on the books, within your reach	Dashboard
Sankalps	Pledges recorded for the selected year	Dashboard
Total Sankalp Amount	The sum of those pledges, ₹xx,xxx	See sankalp amounts
Collected	Money received so far, with the percentage	See collected amounts
Pending	Pledged minus collected	See pending amounts
Passes Created	Passes generated for the year	Dashboard
Attendance	Checked in, against the number expected	Dashboard

Center-wise Summary

Below the cards • one row per center

Column	What it holds
Center	The center name, in your language
Sankalps	How many pledges that center has recorded
Amount	What they add up to, ₹xx,xxx
Collected	Received so far
Pending	Still owed
Progress	Collected as a share of pledged, as a bar and a percentage

HOW TO READ IT IN FIVE SECONDS

A center at 0.0% has pledges but no money in yet. A center with no pledges at all has not started. A center user sees only their own center here, so their total will never match the Head Office total — that is the filter working, not a fault.

Members

5

Everybody • Center users lead this

The Members list, column by column

Everybody

Column	What it holds
Member ID	The identifier the system generates — never invent your own
Name	In English and Gujarati; the one shown follows your language
Type	Individual, firm or company. It decides what the pledge screens ask for
Center	The center the member belongs to
Mobile	Used for WhatsApp and SMS
Sankalp (year)	What they have pledged this year, ₹xx,xxx
Collected / Pending	Received against it, and what is still owed
Action	Eye to view, pencil to edit, bin to delete

The buttons along the top

Members • *what you see depends on your rights*

Button	What it is for	Right needed
New Member	The full form, one member at a time	Add a member (full form)
Fast Entry	A grid for typing a long list without the mouse	Fast Entry for members
HO Attendees	Marks who attends at Head Office instead of their own center	Mark who attends at Head Office
Import / Export	CSV in and out	Import CSV / Export CSV

WHY HEAD OFFICE MARKING MATTERS

A member marked as attending at Head Office is counted on the HO side of the attendance report rather than against their center. It is what stops a center looking as though half its members never turned up.

Adding a member

Anyone with Add a member

1 Click New Member

2 Enter the name in English and Gujarati, mobile, and the center

3 Choose the member type

Individual, firm or company — this decides what the pledge screens will ask for later.

4 For a firm or company, add the firms they hold

Each one can carry its own pledge, and its own partners or directors.

5 Set the dharmada type and amount, if they have one

6 Save

The Member ID is generated for you.

Two ways to add people

Center users • Team Members

Fast Entry — for a list

- One row per person, Enter moves down
- No mouse, no dialogs, no waiting
- The right tool for the first load of a season

The full form — for detail

- Name in both languages, mobile, center, type
- Firms and companies, with their partners
- Dharmada type and amount, address
- Better for one careful record than for forty

BEFORE IMPORTING A LONG FILE

Export first, even when you are importing — the file you get back is the exact shape the importer expects. Then import a handful of rows and look at the result. An import that goes in wrong is far slower to unpick than it was to load, and duplicate members are the usual outcome of a second attempt.

Sankalp (Pledge)

6

Everybody • Center users lead this

What a sankalp is

Everybody

A sankalp is one pledge, for one year, by one member — or by one of their firms. A member with three firms has three pledges, and they appear as three rows with the same Member ID.

Searching and filtering

- The **search box** takes a name, ID, mobile, center, firm, seat or amount — and several at once, separated by commas
- The **Show** box narrows the list to seats allotted, or opens it to everybody
- The **Year** box decides which puja year you are looking at

Sorting

- Every column heading sorts; shift-click adds a second level
- **Seat No.** sorts by darshan first: two green ticks, then one, then none
- Within each group, in the order the ticks were given, then by seat number
- Rows with no seat sink to the bottom either way

The Sankalp list, column by column

Everybody

Column	What it holds
Seat No.	The seat given at check-in, with the darshan ticks beside it. Blank until they arrive.
Member	Member ID, name and mobile, together in one cell
Primary Center	The center the member belongs to
Sankalp Type	Individual, firm, firm (partnership), company or company (director)
Sankalp Name	The firm or company the pledge is in the name of
D. Type / Dharmado	The dharmada type and amount held on the member — shown in bulk edit
Amount	The pledge itself, ₹xx,xxx
Collected	Received against it so far
Pending	Amount minus collected
Collecting Center	Where the money is being collected, when that is not the member's own center
Action	View, edit, carry forward, delete — whichever your rights allow

The buttons along the top

Sankalp • what you see depends on your rights

Button	What it is for	Right needed
New Sankalp	The full form, one pledge	Add a sankalp
Fast Entry	A grid for entering many pledges from a paper list	Fast Entry for sankalp
Bulk message	Sends a message to everyone in the filtered list	WhatsApp / SMS / email
Bulk edit	Confirm or revise a stack of amounts in one pass	Bulk edit sankalp amounts
Bulk carry forward	Copies pledges into the next year	Carry forward to another year
Import / Export	CSV in and out	Import CSV / Export CSV
Guruji Darshan	The desk screen — see section 10	Guruji Darshan

Adding a pledge

Anyone with Add a sankalp

- 1 Click New Sankalp**
- 2 Find the member by ID or name**
- 3 Choose which firm the pledge is for**

Only asked if the member holds more than one.

- 4 Enter the amount**

For example ₹xx,xxx.

- 5 Set the collecting center**

Only if the money will be collected somewhere other than the member's own center.

- 6 Save**

Bulk edit

Anyone with Bulk edit sankalp amounts

Turns the list into a grid you can type straight into: dharmada type, dharmada amount, the pledge, a tick to save the row and a remark. It is built for working through a pile of slips.

1 Click Bulk edit

The screen goes full width and the extra columns appear.

2 The rows are ordered by darshan

The people Guruji has finished come first, in the order he saw them — those are the ones whose amounts were just confirmed.

3 Type the amount into a row and tick Save

The row is written and stamped with the time and your name.

4 Use + on a row to add another pledge for the same member

5 Clear ticks undoes the ticks on screen

It does not undo anything already saved.

6 Click Exit bulk edit when you are done

AN AMOUNT CAN NEVER GO BELOW WHAT HAS ALREADY BEEN COLLECTED

If ₹xx,xxx has been received against a pledge, the pledge cannot be set lower than that. The system refuses it and saves nothing. Fix the collection first if it was entered against the

Bulk carry forward

Anyone with Carry forward to another year

Copies a set of pledges from one year into the next, so a season starts from last year's list rather than from nothing.

What it asks you

- The year to copy **from**, and the year to copy **into**
- The center, or all centers
- What the new amount should be: the same as last year, what was collected, or a percentage of it

What to watch

- **Run it once** — running it twice creates duplicates
- It tells you how many rows are ready before it writes anything
- A member who already has a pledge in the target year is skipped, not doubled
- The Action column also carries a carry-forward button for one pledge at a time

Collection

7

Center Accountant • anyone with the right

The Collection list

Anyone with the Collection page

Column	What it holds
#	The row number in the list as filtered
Date	The date the money was received — not the date it was typed in
Center	The center the money was collected at
Amount	What was received, ₹xx,xxx
Remarks	The mode and reference: cash, cheque number, transaction ID
Action	Delete, for Admin and Super Admin only

The buttons along the top

- **New Collection** — needs *Enter a collection*
- **Import / Export** — CSV in and out

Entering money

Anyone with Enter a collection

1 Click New Collection, and pick the center and year

2 Choose individual or firm-wise

Individual clubs a member's firms into one figure; firm-wise is one pledge, one entry.

3 Find the member, then the pledge

4 Enter what was received

It may be part of the pledge — part payments are normal, and the balance stays in Pending.

5 Set the date the money arrived

Not today's date, if the two differ.

6 Record the mode and reference in Remarks, and Save

THE ONE RULE THAT MATTERS

Revising a pledge needs a reason, and the reason is kept

Change an amount that is already recorded and the system asks why, then keeps the old figure, the new one, your name and the time. Deleting a collection needs its own right and is recorded the same way. Delete one that was entered in error — never one that was refunded. A refund is a separate matter, and deleting the receipt loses the fact that the money once arrived.

Passes

8

Center users print theirs • Team Members print in bulk

The Passes list, column by column

Everybody

Column	What it holds
Seat No.	Blank until they check in — the seat is given at the gate, not with the pass
Pass Number	The number and QR code on the paper, e.g. YJ0501
Pass Type	Yajman, Guruji or General
Member ID / Member	Who the pass belongs to
Center	Their center
Sankalp Amount	What they pledged, ₹xx,xxx — behind the sankalp money right
Status	Used, remaining, print awaited, or printed
Action	Print, reprint, or delete

FILTERS ON THIS PAGE

Besides Year and search there is **Pass type**, and a **Show** box for seats allotted or all passes.

The buttons along the top

Passes

Button	What it is for	Right needed
Generate Pass	Creates passes for a center, a year and a pass type, in one run	Generate passes
Pass Config	The prefix and starting number for each pass type	Change pass numbering
Bulk print	Prints everything in the filtered list, in order	Any print right

Generating, step by step

- Choose the year, the pass type and the center
- Narrow by pledge amount if you want, or hide those already issued
- Tick the members, or Select all
- Generate — numbers are allotted in one run, in order

What a pass carries

Everybody

Office copy and Member copy are printed together. Both carry the same pass number and seat; only the office copy shows money.

Option	What comes out	When to use it
Card	The card layout, several to a sheet	Cutting and handing out at the center
Card (plain)	The same size without the background	Plain paper, or a printer short of ink
Member copy	The member’s copy, with no amounts on it	Anything the member keeps
Office copy	The same pass, with the pledge amount ₹xx,xxx	The office stack only — never hand one across a table

Attendance

9

Gate volunteers • everybody registering walk-ins

The attendance list, column by column

Below the keypad • newest first

Column	What it holds
Seat No.	The seat given on arrival, with the darshan ticks beside it as the day goes on
Pass Number	The pass that was scanned
Member ID	Who it belongs to
Member	Their name
Center	Their center — or Head Office, if that is where they were registered
Check-in time	To the second, as it happened

The buttons along the top

- **Seat slips** — prints the slip handed over at check-in; needs *Print the check-in seat slips*
- **Guruji Darshan** — the tick box before Scan; see section 10
- **Full screen** — hides everything but the keypad, for a busy gate

Checking people in

Anyone with Check people in

1 Scan the QR, or type the number

501 finds YJ0501. The whole code works too.

2 Press the green Check-In key

3 Read the seat number out

It appears in the panel with the member's name.

4 A repeat scan is not an error

The panel says so and shows the same seat again — one person, one seat, all day.

What the panel colour means

- **Green** — checked in, seat number shown
- **Green, marked repeat** — already in, same seat
- **Blue** — darshan mode is on; see section 10
- **Red** — not found, or the wrong year in the box

Somebody who is not on the list

Center users • Team Members

1 Tick "Today is the event date"

It only appears if you can generate passes and check people in.

2 Register them

A name and a mobile number is enough to get them in.

3 A pass and a seat are made together

They join the list like anybody else.

4 Fill in the rest afterwards

The queue at the gate is not the place for it.

WHERE A WALK-IN IS COUNTED

Whoever is at the desk decides it

A Team Member working the Head Office desk registers somebody, and that person counts at Head Office. A center user registers them, and they count at that center. This is why the same walk-in can look as though it landed in the wrong place: it landed where the person who registered them was sitting. On the report, Expecting = Present + Absent for each half, walk-ins included.

Guruji Darshan

10

Two desks, two green ticks — read this section whole

How the two halves fit together

Everybody • Attendance and Sankalp, one job

Guruji Darshan is one piece of work spread across two screens, each worked by a different person.

Stage	Where	Who	What it leaves
Arrival	Attendance → Check-In	Gate volunteer	A seat number
Sent to darshan	Attendance, with Guruji Darshan ticked	Darshan-line volunteer	One green tick after the seat number
Darshan finished	Sankalp → Guruji Darshan desk	Whoever sits with Guruji	Two green ticks, and the pledge confirmed

WHO NEEDS THE RIGHT

Both desks need **Guruji Darshan**, which sits in the **Sankalp** group on the Roles screen. Without it the tick box does not appear on either page. Grant it to the volunteers working the darshan line and to whoever sits with Guruji.

The two ticks

Everybody • both marks sit beside the seat number

001

No tick — came in, not sent

004

One tick — sent to darshan

007

Two ticks — darshan completed

No tick

Checked in, but the attendance desk has not sent them to darshan. They sit on **Pending for Darshan**.

One green tick

Sent to darshan by the attendance desk. Their seat number does not change. They sit on **Checked in**, waiting for Guruji.

Two green ticks

Finished at Guruji's desk with Save & Next — the pledge confirmed with them. They move to **Darshan Completed**.

THE TICKS SHOW IN FOUR PLACES

Beside the seat number on the attendance list; beside it on the Sankalp list; in bulk edit, where finished people sort to the top; and in the attendance report, as the Darshan column and the Difference.

Part one — at the attendance desk

Attendance page • anyone with Guruji Darshan

1 Tick Guruji Darshan, just before Scan

The green key changes to read Guruji Darshan and the card gets a green outline — so nobody believes they are still giving seats.

2 Scan each person as they go through

A pass number, the bare digits, a Member ID or a seat number.

3 One green tick appears after their seat number

The seat they were given on arrival does not change.

What it will not do

- It never gives a second seat number. One person, one seat, all day
- A second scan says *already sent for darshan* rather than failing — in a queue the same pass is read twice constantly
- Somebody never checked in is refused by name: darshan is marked against a seat, so there has to be one

The box is off every time

- It resets on every page load, deliberately

Part two — Guruji’s desk

Sankalp page • tick Guruji Darshan, just before Show

The screen goes full width — no menu, no pledge list underneath — and the desk opens.

Guruji Darshan entry

Darshan Completed

Pending for Darshan

007  Member name

2025 Sankalp	2025 Pending	Dharmada	2026 Sankalp
₹xx,xxx	₹xx,xxx	₹xx,xxx	₹xx,xxx
₹xx,xxx	₹xx,xxx	₹xx,xxx	₹xx,xxx

CHECKED IN

008 Member name

009 Member name

010 Member name

WATCH

10:17:39 AM

Checked in, on the right

Everyone the attendance desk has sent, in that order. Seat number and name only. A name leaves the list once you finish them.

Darshan Completed

A button with a count. The list of everyone finished, newest first.

Pending for Darshan

A button with a count. Everyone who came in but was never sent to darshan — the list somebody walks the hall with.

Jump to member

For taking somebody out of order — a Member ID, a pass number or a seat number.

The watch

The time of day in large figures. Hide collapses it, Show brings it back.

What Guruji sees, column by column

One member at a time — every firm they hold on the one screen

Column	What it holds
Sankalp Name	The firm or company the pledge is in the name of. A member with three firms shows three rows.
Sankalp Type	Individual, firm, partnership, company or director
2025 Sankalp	What they pledged last year, ₹xx,xxx — the heading carries the real year
2025 Pending	What was still owed at the end of last year
Dharmada Type	R, I/R, P or N — held on the member, so typing it in any row fills the others
Dharmada Sankalp	The dharmada amount, ₹xx,xxx
2026 Sankalp	This year’s pledge, and the only box you normally change

WHY LAST YEAR IS ON THE SCREEN

It is the question actually asked at the desk. Last year’s receipts are of no interest now, so the second column is what was still *owed* at the end of the year rather than what came in.

Working the queue

Part two • one person at a time

1 The first person waiting loads by itself

Nobody types anything. The queue refreshes every few seconds, so anyone marked at the gate appears here without a reload — but it never swaps out the person in front of you.

2 Read their pledges with them

Every firm on the one screen, with last year beside this year.

3 Change an amount only if it needs changing

Leave a box alone and the stored amount stands. An empty box is a box nobody touched, not a pledge of nothing.

4 Press Save & Next

The amounts are written, darshan is finished, and the seat number comes back with two green ticks. The next person loads on their own.

CANCEL DOES NOT FINISH ANYBODY

It skips whoever is on screen. They have not been to darshan, so they stay in the queue and come round again — which is right for somebody who steps out of the line for a moment.

NOTHING IS EVER HALF-MADE

A refused amount leaves no tick behind it

Set a pledge below what has already been collected and Save & Next refuses the whole thing: no amount is written and no tick is given. Nobody can end up marked as finished against a figure that was never stored. Somebody reached through Jump to member who was never marked at the gate gets both ticks at once — they plainly did go to darshan, and a row finished but never started would break the counts.

The two lists, and what they are for

Everybody at the desk — especially late in the day

Checked in

- Sent to darshan, not yet finished
- The work in front of you, in the order they were sent
- A name leaves it the moment Save & Next is pressed

Pending for Darshan

- Came into the hall, never sent to darshan at all
- Seat, pass, name, pledges and amounts ₹xx,xxx
- Late in the day this is the number to act on — print it and walk the hall

Darshan Completed

- Everyone finished, newest first — so the person you just saved is at the top, not the first one of the morning
- Seat, pass number, name, the firms and the amounts
- The count on the button is the day's total

Reports

11

Team Members mostly • Center users see their own

What each report answers

All of them print landscape, with no screen furniture on the page.

Report	Columns	The question it answers
Sankalp Summary	Pass number, Member ID, Member, Primary Center, Type, Sankalp Name, Amount, Collected, Pending	Every pledge, one row each — the one to export when somebody asks for "the full list"
Center Summary	Center, Members, Sankalp, Amount, Collected, Pending, Passes, Attendance	How is each center doing?
Year on Year	Year, Sankalp Name, Amount, Collected, Pending, Collected by	One member, or one center, this year against last
Attendance Report	See the next page	Who was expected, who came, and who went to darshan

The attendance report

Everybody with Reports

Column group	Columns	What it answers
—	Center, Total Members	Who is on the books
At Center	Expecting / Present / Absent	Who was due at their own center, and who came
At Head Office	Expecting / Present / Absent	The same for those marked as attending at HO
Guruji Darshan	Present / Darshan / Difference	Of everyone who came, how many went to darshan — and who did not

EVERY FIGURE OPENS ITS OWN LIST

Click **Difference** and you get the people behind it, with their seat numbers, so they can be found in the hall. Somebody who never arrived is *absent*, not "missed darshan" — they are kept out of the Difference on purpose, because mixing the two would make the number useless. Expecting includes walk-ins.

Two habits worth having

Everybody

Click the number

- Every figure on the attendance grid opens its own list
- Difference gives you the people to go and find
- Faster than exporting and filtering by hand

Sort by more than one column

- Click a heading to sort; shift-click to add a second
- Up to three levels — centre, then seat, then name
- Seat No. sorts by darshan first: two ticks, then one, then none

When something refuses

15

Everybody

What the message means

The system says why. Reading it is faster than trying again.

What you see	What it means	What to do
Already checked in — same seat	They were scanned earlier today	Read out the same seat number
Has not been checked in yet	Darshan marked for somebody with no seat	Check them in at the gate first
Amount must be greater than zero	A pledge box was left at zero	Type the real amount, or leave the box untouched
Has already been collected	A pledge set below money already received	Correct the collection first
The page is empty	Wrong year, or a filter left on	Check the Year box, then clear the search
A menu entry is missing	You do not hold that right	Ask for it — do not borrow a login
Amounts show as a dash	You do not hold that money right	Normal. Ask if you need the figures
The Guruji Darshan box is not there	The right has not been granted	Roles → Sankalp group → Guruji Darshan

THE ONE THING NOT TO DO

Never turn somebody away because the system will not cooperate

If the app is slow, the network is down, or a pass will not scan, let them in and write it down. A member sent home is a problem no correction can fix afterwards; a note on paper is ten minutes of typing later. The same goes at the darshan line — if the desk will not take somebody, they still go for darshan, and the tick can be caught up.

Who to ask, and what to tell them

Everybody

Tell them this

- What you were doing, in one sentence
- What you expected, and what happened instead
- The exact words on the screen
- The time, and the seat or Member ID involved

They can check

- Activity Log — every change, with who and when
- Sent messages — whether a message really went
- The attendance report — who was expected and who came
- "It is not working" cannot be acted on; a time and a seat number can be fixed in a minute

SMVS • CHOPDA-PUJAN

Jay Swaminarayan

Keep this manual where the volunteers are. The system records what happened; this explains what to do.
